

# East Gulf Coastal Plain Joint Venture

Conserving birds and their habitats in Louisiana

## Who We Are

The East Gulf Coastal Plain Joint Venture is a self-directed partnership of 14 state, federal, private, and academic organizations working together to coordinate bird conservation efforts in the coastal plain of six southeastern states.

Our region covers 63 million acres of diverse habitats including longleaf pine forests, native prairies and grasslands, and forested and coastal wetlands. By conserving key habitats, we advance our mission of protecting and restoring bird populations.

## Louisiana Partnerships in Action

- ❖ The Sandhills Multi-state Wildlife Grant restores and manages longleaf pine on both public and private lands for Gopher Tortoise and other at-risk species
- ❖ The East Gulf Coastal Plain Prescribed Burn Initiative provides funding for prescribed burning on private lands
- ❖ The Joint Venture's Open Pine Decision Support Tool guides conservation efforts in Louisiana, focusing resources in areas with the highest restoration potential
- ❖ *A Burning Issue: Prescribed Fire and Fire-Adapted Habitats of the East Gulf Coastal Plain* is a communications strategy that promotes the use of prescribed fire in the Southeast
- ❖ *Desired Forest Conditions for Southern Pine Ecosystems* guides habitat enhancement for wildlife and open pine habitats

## How We Work

Our partners realize the benefits of working together to conserve birds in our geography. By using sound science, we are able to insure that conservation funding is used in the most effective and efficient ways. As a result, conservation actions are targeted where they are most needed and provide the greatest wildlife benefit and economic value. Habitat projects are prioritized by their contribution to restoring and maintaining regional bird diversity and abundance.

## Conservation for Birds and People

Bird-related outdoor recreation is a large and growing industry in the United States. Our partners' efforts on both public and private lands improve habitat for wildlife and provide recreational opportunities for individuals and families to enjoy.
